

## Reference Projects

**Old Main**  
Penn State University

University Park, PA

Building Gross Square Foot Area: 90,000 s.f.

Completion Date: 2002 (Projected)

Contact: Marv Bevan, Project Manager, Ph: 865-3474

Ling Partnership was given the responsibility to study and design the mechanical renovation of Old Main to bring in outside ventilation air to all five floors of this historic Penn State landmark. The renovation project will include installation of the air handlers, supply and exhaust ductwork distribution systems, and DDC controls.

Ling Partnership's architectural engineering approach was critical in developing a design solution that would both satisfy the current requirements for ventilation air and preserve the original architecture of the building, both on the exterior and interior.
